

Any item that comes within 1/8 of an inch of the magenta line should extend all the way to the cyan line, 9.5 X 8.5 inches. This is the Bleed area. This insures that any variance in folding or trimming goes unnoticed. No trim marks, targets, calibration bars or non printing information should be inside this area.

This is the final size, once the page is trimmed, 9 X 8 inches.

No type or logos should be outside of this area, 8.5 X 7.5 inches.
